

Connection cable supplied with monitor, explanation of cable colours

Color	Name	Function
RED	B+ (Battery Positive)	Constant power line. This wire is connected directly to the vehicle's battery and provides a steady power, regardless of ignition status.
BROWN	ACC (Accessory)	Accessory power line. Supplies power only when the ignition key is in ACC or ON position. Used to turn the monitor on/off with the vehicle.
BLACK	GND (Ground)	Ground line. This wire is connected to the vehicle chassis and serves as the electrical ground.
GREEN	Back Trigger (Reverse Signal)	Reverse trigger wire. Receives power when the vehicle is shifted into reverse gear, triggering the monitor to automatically switch to the rear view.
